

Computer Class: Computer Basics

This beginner's class will show you how to use the mouse and keyboard, open and close programs, save files, and navigate around a computer. You will also learn about organizing, creating, copying, and moving files and folders. The skills taught in this class are required knowledge before taking any of our other computer classes.

This class is a prerequisite for our other computer classes. If you do not possess the skills listed above, you must take this class before signing up for any other classes. If you already possess all these skills, you do not have to take this class first.
